

Praveen Bachoti

APPIAN DEVELOPER

Germantown, MD | 2404218266 | bachotip@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

4+ years of experience in the implementation and delivery of Appian solutions. Able to bridge requirements and design into production-ready software. Proficient in the Appian platform (SAIL, process modeling, SQL DB development, integrations), and object-oriented programming fundamentals using Java and Python. Leverages quality orientation with deep UX/UI acumen to eliminate usability friction. Adept at rapidly mastering new enterprise workflow automation architecture. Brings strong skills in systems analysis, cross-functional collaboration, and stakeholder communication.

TECHNICAL PROFICIENCIES

- Platform as a Service: Appian
- Languages: Java, C#, Python, JavaScript, TypeScript, SQL
- Frontend: HTML5, Tailwind CSS, Angular, XAML, Bootstrap, jQuery
- Backend/API: ASP.NET Core, RESTful Web APIs, MongoDB, PostgreSQL

EXPERIENCE

Professional Development Year

Self-Directed Professional Technical Upskilling

Germantown, MD

September 2025 – Present

- Expanding Appian platform engineering expertise, focusing on complex data modeling (Record Types, custom SQL integrations), dynamic SAIL interface design, enterprise process workflow automation, and custom web API integration in preparation for L2 certification advancement.
- Building GitOps fundamentals using GitHub Actions, GitLab CI/CD pipelines and Terraform Infrastructure-as-Code to provision cloud environments dynamically upon code push.
- Modernizing legacy web application repositories, integrating agentic AI tooling into daily development workflows to accelerate code refactoring.
- Authoring comprehensive automated E2E and integration test suites in Playwright across personal repositories, integrating regression checks and verifying UI/API edge cases.

ICF

Appian Developer

Reston, VA (Remote)

November 2024 – August 2025

- Engineered dynamic interfaces, process models and record types for a 3-module enterprise Appian PaaS web solution, streamlining complex user workflows.
- Developed custom HTML/CSS rendering templates for PDF export pipelines, improving data formatting consistency and output generation efficiency across the platform.
- Designed and optimized relational MariaDB database tables using SQL, and enhanced Appian BPMN object data processing and database writing in Hibernate ORM framework using SAIL.
- Refactored legacy front-end interfaces, reducing page load latency, maximizing application responsiveness, and collaborating with UX teams to establish reusable UI/UX design systems.
- Diagnosed and resolved critical application bugs, refactoring system logic to eliminate technical debt and ensure architectural stability ahead of major production deployments.

Octo Consulting Group, Inc.

Appian Developer

Rockville, MD (Remote)

March 2022 – June 2024

- Modernized 3+ legacy front-end interfaces within the 4+ module Appian solution using dynamic SAIL programming and UI design best practices, which eliminated usability-related support requests.
- Implemented an issue tracking feature enabling ticket submission, that reduced resolution time by 50% and unresolved issues by over 95%, resolving a major production management pain point.
- Built custom dashboards and roll-up reports from scratch using SAIL components and SQL queries, streamlining transaction monitoring and enabling data-driven decision-making.

- Architected preliminary Appian interfaces, process models and data fabric for an enterprise initiative, translating uncertain legacy processes into concrete technical specifications that secured stakeholder buy-in.
- Set up a nightly procedure to transfer production data from an Appian system to a .NET system using AWS S3 buckets in Hibernate for intermediate storage, seamlessly integrating the two systems into a common workflow.

Octo Consulting Group, Inc.
Software Quality Engineer

Rockville, MD (Remote)
April 2019 – February 2022

- Automated tests using Python & JavaScript, reducing daily manual work from an average of 4 hours a day to minutes, and achieving a 125% increase in defect discovery per sprint, freeing up over 80 hours per month.
- Integrated automated pre-merge tests into a CI/CD pipeline with GitLab, by housing batch test automation scripts on an AWS EC2 instance, and writing a YAML pipeline script to execute them against production deployments.
- Architected suite of automated end-to-end regression tests using TestComplete, smoke tests, cross-app integration tests, and functional sprint tests, mapping tests onto feature tickets across 4+ enterprise applications.
- Tested REST API endpoints using Swagger, verifying request/response behavior, data integrity, and error handling across integration points between front-end and MS SQL Server database.
- Flagged specific application features to optimize for automatability via DOM mapping during the early development stages, proactively ensuring 100% coverage of functionality during testing cycles.

Pyramid Systems
UI Engineer and UX Designer

Fairfax, VA
May 2017 - March 2019

- Engineered robust UI features in C# and XAML for a .NET WPF desktop solution following the Model-View-ViewModel (MVVM) pattern, integrating peripheral devices.
- Created 100+ unit tests across the architecture, spanning user interfaces and services, using Specflow and FluentAssertions, increasing code coverage by 25%.
- Packaged and verified software builds using Jenkins CI, ensuring deployment readiness across release cycles.
- Designed and presented high-fidelity .NET prototypes that increased stakeholder buy-in, supporting alignment between developers and clients.

EDUCATION

Boston University
M.S. in Computer Information Systems
Concentration in Web Application Development

Graduation May 2023
GPA 3.91

University of Maryland Baltimore County
B.S. in Information Systems
Certification in Web Development

Graduation December 2016
GPA 3.51

CERTIFICATIONS

Appian
Appian Certified Associate Developer

January 2025 – July 2026

Amazon Web Services
AWS Certified Cloud Practitioner

August 2020 – August 2023
